

Dear Mr Pai,

It is imperative to me that strong rules preserving Net Neutrality and internet freedom be maintained to strengthened. Cable television is proof positive that corporate monopolization and homogenation of content does NOT create innovation or inspire infrastructure investment. Unchecked corporate control will drag the entire internet down to the lowest common denominator of society, and limit choice, innovation, expression and thought. Please create an open intellectual playground, and maintain or strengthen government affirmations for internet neutrality.

You are no longer supposed to serve Verizon in your current office. You have agreed to serve the American People. Please act in our best interest and support absolute Net Neutrality. Thank you.
